TECHNICAL SKILLS

- **Languages:** Python, C++, Java, SQL, JavaScript
- **Frameworks & Web Tools:** React, Node.js, Streamlit, Lovable.dev, Express
- **Hardware & IoT:** ESP32, Arduino, Microcontrollers, GPS/GSM Modules
- **Developer Tools & Databases:** Git, GitHub, VS Code, MySQL, MongoDB
- **Core Concepts:** Machine Learning, Cryptography, Network Security, Object-Oriented Programming

KEY PROJECTS

[Project Name 1: Disease Outbreak Prediction System] / *Python, Scikit-Learn, Streamlit, Git*

- [Action Verb] an ML-driven predictive application to forecast localized disease outbreaks using public health datasets.
- Optimized Random Forest & XGBoost models to hit **94% classification accuracy** and engineered a sleek user UI backend via Streamlit.
- **Key Milestone:** Integrated an active dual-language (English/Hindi) localization toggle interface for improved accessibility.

[Project Name 2: Real-Time IoT Incident Detection Device] / *ESP32, Embedded C++, GPS/GSM Modules, MPU6050*

- Architected firmware for an autonomous vehicular accident detection system deployed on an **ESP32 microcontroller**.
- Programmed localized fall algorithms parsing raw telemetry; triggered emergency SMS alert coords within **5 seconds** of threshold impact.
- **Key Milestone:** Successfully prepared formal technical disclosure specifications to file for architectural patent protection rights.

EXPERIENCE & LEADERSHIP

- **Technical Team Lead | Hackathon Health Track:** Directed a **3-member team** during a 48-hour development challenge; managed unified Git workflows and system integration for a prototype application.
- **Core Organizer / Coordinator | Department Tech Fest:** Orchestrated technical word puzzles and guessing contests driving engagement for over **150+ active student participants**.

EDUCATION

B.Tech in Computer Science and Engineering

Kits Akshar institute of technology, Guntur, Andhra Pradesh

Timeline: 2023 – 2027 | Regulation: JNTUK R23 | Current Cumulative CGPA: 7.0 / 10

HONORS & CERTIFICATIONS

- Shortlisted in the Top 10 Project Teams out of 80+ submissions on the 48-Hour Healthcare Hackathon track.
- Completed NPTEL Elite Certification courses in Introduction to Cryptography and Network Security.
- Active core code contributor to the University Open-Source and Technical Innovation clubs.
- Completed C certificate in NCC (national cadet corps) with a silver medal in gun firing.
